# Here's why the GRE® General Test stands out from other graduate admissions assessments.

More applicants. More diversity. More reasons to accept GRE scores.

## A proven record of success in partnership with the graduate community

For nearly six decades, the GRE® General Test has played an important role in the graduate admissions process

- Taken by more than 600,000 students from 230 countries — more than any other test in the 2007 testing year
- Scores reported to more than 3,200 institutions and fellowship sponsors annually — more than any other test
- Developed and administered by ETS, the world's largest private nonprofit educational testing and measurement organization and a leader in education research
- Ongoing development of the GRE testing program is facilitated by the GRE Board, whose members include graduate deans appointed by the Association of Graduate Schools and the Council of Graduate Schools

## Helps you assess ability and predict performance

- Measures verbal reasoning, quantitative reasoning, critical thinking and analytical writing skills — the same as the GMAT® exam
- Provides common measures of these skills for comparing the qualifications of applicants from different education backgrounds and countries of origin
- Offers a valid predictor of graduate school performance, as confirmed by a recent independent study using 82,000 graduate students and more than 1,700 studies containing validity data for GRE tests

## Convenient and cost-effective

- Most extensive test center network in 165 countries worldwide
- Price per test is substantially less than many other tests, including the GMAT exam
- The GRE program provides assistance with the test fee to individuals with a demonstrated financial need
- Free test preparation software is available to all test registrants to help them do their best
- Test takers can send scores to up to four graduate institutions at no extra cost
