

2007-2008 GRE Undergraduate Institution Summary Statistics Report

The Summary Statistics Report on the reverse side is based on the scores of seniors at your institution and unenrolled college graduates who graduated within the past two years who took the GRE General Test or a Subject Test between July 2007 and June 2008. The report includes the scores of all individuals who listed your institution as their undergraduate institution on the GRE registration form, regardless of whether they requested specifically that their scores be sent to you.

The first page of the report is an overall summary for your institution. If five or more students from any one department took the General Test or a Subject Test, a separate report is provided for that department. Because students were limited to indicating their undergraduate major fields as they were listed in the *GRE 2007-08 Information and Registration Bulletin*, the names of some of your undergraduate departments may not match this listing.

Summary Statistics Reports can be used to make comparisons with other GRE score interpretive information, such as the table below, or with Table 4 in the 2008-09 *GRE Guide to the Use of Scores* and on the GRE website at www.ets.org/gre/edupubs.

We hope you will find these summary statistics useful. If you have any questions or suggestions for improvement, please contact us at 1-609-771-7091 or CodeControl@ets.org.
