

Instructions for Using Braille Supplement Booklets with the *POWERPREP PLUS*® Online Practice Tests

The following instructions provide information for using braille supplement booklets with the Quantitative Reasoning sections of the *POWERPREP PLUS*® Online practice tests and answer explanations.

Materials

Before you begin your practice test, make sure that you have received the following:

- One (1) bundle containing four (4) booklets for use during the practice test. This set of booklets will have “Questions” on the cover and an embossed symbol(s) in the upper left corner of the first page.
- One (1) bundle containing four (4) booklets for reviewing Quantitative Reasoning answer explanations. This set of booklets will have “Explanations” on the cover and an embossed symbol(s) with an “E” inside, located in the upper left corner of the first page.

Note: If you purchased two practice tests, you will receive four (4) bundles.

To identify the booklets needed for your specific practice test, use the tables on pages 3-6 of this document.

If you are missing any of the above materials, contact ETS Disability Services by email at stassd@ets.org or by phone at **1-609-771-7780**, Monday–Friday, 8:30 a.m.–5 p.m. ET (New York).

Taking the Practice Test

There are two Quantitative Reasoning sections in the *GRE*® General Test practice test. As in the actual *GRE* General Test, the Quantitative Reasoning measure in the practice test is section-level adaptive—that is, the computer selects the second section of the Quantitative Reasoning measure based on your performance on the first section. Therefore, it is important that you choose the correct booklet designated for each section using these instructions.

Instructions:

1. Before you begin your practice test, organize your booklets. Make sure that you have four (4) braille question supplement booklets (one First Stage booklet and three Second Stage booklets). You will use the First Stage booklet during the first Quantitative Reasoning section and one of the three remaining Second Stage booklets for the second Quantitative Reasoning section.
2. Have the First Stage booklet ready for the first Quantitative Reasoning section of your practice test. When you get to the first Quantitative Reasoning section of your practice test, use this booklet as needed.
3. When you have completed this section, close the First Stage booklet and continue to the next section.
4. When you reach the first question in the second Quantitative Reasoning section, you will need to identify the Second Stage question booklet needed for this section. To do so, review the quantity in the Quantity A region of question 1 in your practice test and choose the booklet that corresponds to that Quantity A in the table. You only need to consider the table for the practice test you are taking (Practice Test 1 or Practice Test 2).

For example, if you are taking Practice Test 1 and ‘The probability that the value of $(-1)^{r^2}$ will be 1’ is in the Quantity A region, you would choose the booklet titled *General Test Braille Supplement for use with Digitally Accessible POWERPREP PLUS® Online Practice Test 1, Second Stage: Diamond* with 1 diamond symbol embossed in the upper left corner of the first page.

5. Complete this section of the test using the Second Stage booklet as needed. When you have completed this section, close the booklet and continue to the next section of the test. The braille supplement booklets will not be needed for the remainder of the practice test.

NOTE: During the actual GRE General Test, an aide will be present to provide you with the appropriate braille supplement booklet for each section of the Quantitative Reasoning measure. You will **NOT need** to choose booklets on your own on test day.

Reviewing Your Test

Once you have completed your practice test, you will be able to access your answer to each question, the correct answer, and an explanation of the correct answer. For this review, you will need the explanation booklets that correspond to the same sections that you encountered in the test. These booklets will have “Explanations” on the cover as well as an embossed symbol(s) with an “E” inside, located in the upper left corner of the first page. You can identify the booklets needed for reviewing your specific practice test using the tables on the following pages. Remember to only consider the table for the practice test you are taking.

Instructions

1. Use the First Stage Answer Explanation booklet during your review of the first Quantitative Reasoning section of the practice test.
2. When you reach the first question in the second Quantitative Reasoning section, identify the Second Stage Answer Explanation booklet needed to review this section. To do so, review the quantity in the Quantity A region of question 1 in your practice test and choose the booklet that corresponds to that Quantity A in the table. You can also identify the Second Stage Answer Explanation booklet by matching the full title of the second stage questions booklet used during the practice test with the full title of the second stage explanation booklet.
3. Once you have completed reviewing this section, the braille supplement booklets will not be needed beyond this point unless you decide to review your answers from the first or second Quantitative Reasoning sections again.

Practice Test 1 - Practice Test Question Supplement Booklets

Title of test book	Description of shape embossed on first page	Quantity A
GRADUATE RECORD EXAMINATIONS® General Test Braille Supplement for use with Digitally Accessible POWERPREP PLUS® Online Practice Test 1 First Stage Questions	1 circle	$125n$
GRADUATE RECORD EXAMINATIONS® General Test Braille Supplement for use with Digitally Accessible POWERPREP PLUS® Online Practice Test 1 Second Stage: Square Questions	1 square	The sum of the areas of the unshaded regions inside rectangle $RSTW$
GRADUATE RECORD EXAMINATIONS® General Test Braille Supplement for use with Digitally Accessible POWERPREP PLUS® Online Practice Test 1 Second Stage: Diamond Questions	1 diamond	The probability that the value of $(-1)^{r^2}$ will be 1
GRADUATE RECORD EXAMINATIONS® General Test Braille Supplement for use with Digitally Accessible POWERPREP PLUS® Online Practice Test 1 Second Stage: Rectangle Questions	1 rectangle	The average (arithmetic mean) amount donated per person in the group
