

Hi,

We are Mekala, Nandha Kumar, Nithish, Mohan and Gowshalya.

We study in Kalvi ITC school, India. We all are friends. We stay together most of the time. We help each other in day to day activities. We never leave any one while going for lunch Or while inside the school. We support each other. We become each other's mentor when we study. We love coming to school and learning together with our friends.

Friendship is so colorful. A person who got lots of true friends is considered to be the luckiest person in the world. We share everything. When a friend didn't get food for him then we tend to share all our food. We share our feelings. When something bad happens at home, we come and share our thoughts with our friends. That gives us a big relief. We can come out of any grievances when we have a good friend to change our mood. Friendship is the only ship which has no state of being destroyed or changed. We love our friends a lot. Thanks to TOEFL for providing us an opportunity to think deeply about our friendship.
