1. Why friends are important?

First of all, two people are better than one person because they have a good reward for their work. Furthermore, if one has a fall, the other will give him a hand. Last but not least, as the saying goes, a cord of three stands is not quickly broken. If friends can stick together, they are likely to come through severe challenges. That's why friends are important to us.

2. What does friendship mean to you?

A friendship to us is that we are like a family. We bond to each other, taking care of each other, and cherishing this relationship. When someone left behind, we all ran to him or her to encourage and cheer the one up.

3. What do you like to do with your friends?

I like to chat and hang out with my friends. I enjoy talking to them such as gossiping, playing jokes, and sharing feelings. I also love to go out with them, which always makes me happy. Wherever we go, it is full of joy all the time; whenever we go, we hold hands and walk side by side.
