1. Overview

About the WorkFORCE® Assessment for Job Fit
The ETS WorkFORCE® Assessment for Job Fit is a 15–20 minute, web-based behavioral assessment designed to help identify candidates with the behavioral skills needed to meet the unique demands of the job.

The assessment measures six critical behavioral competencies along with up to 15 personality attributes. Results from the WorkFORCE® Assessment for Job Fit provide scores for each of the six behavioral competencies as well as an Expected Job Fit Indicator; tailored to the type of job that a company is recruiting for and the behavioral skills needed to perform successfully in that job.

The WorkFORCE® Assessment for Job Fit provides a basis for scoring individuals across a range of organizational, educational and developmental contexts using a framework based on contemporary personality theory and modern scoring techniques.

The WorkFORCE® Assessment for Job Fit Question Format
Administered using the ETS FACETS® engine, the assessment uses an innovative forced-choice response format. In this format, you will be shown pairs of statements. Each pair will be presented one at a time. All the statements refer to how you might typically think, feel and act. Read each of the two statements carefully and decide the extent to which it may describe you. Then, choose the statement that is more like you.

There may be times where neither of the statements is at all like you. In this case, you should select that one that is closer to how you think, feel or behave. When selecting a statement that is more like you, you are not necessarily agreeing with that statement, you are simply saying it is more like you than the other (even just slightly).

After each item response is obtained, your personality attribute scores are estimated and the next item pair is selected and presented to you for response. This process continues until the total number of test items have been completed. A final attribute score is then obtained.
