History of the TOEFL® Program

The *Test of English as a Foreign Language*™, better known as TOEFL®, is designed to measure the English proficiency of people whose native language is not English. TOEFL scores are accepted by more than 6,000 colleges, universities, and licensing agencies in 110 countries. The test is also used by governments, and scholarship and exchange programs worldwide. A list of institutions and agencies that accept TOEFL scores is available on the TOEFL website at www.ets.org/toefl.

The TOEFL Program — A national council on the testing of English as a foreign language was formed in 1962; its members were representatives of more than 30 private organizations and government agencies concerned with the English proficiency of nonnative speakers of English who wished to study at colleges and universities in the United States. The council supported the development of the TOEFL test for use starting in 1963–64. Financed by grants from the Ford and Danforth Foundations, the TOEFL program was first administered by the Modern Language Association. In 1965, the College Board® and Educational Testing Service® (ETS®) assumed joint responsibility for the program. Because many who take the TOEFL test are potential graduate students, a cooperative arrangement for the operation of the program was entered into by ETS, the College Board, and the Graduate Record Examinations® Board in 1973. Under this arrangement, ETS is responsible for administering the TOEFL program with guidance from the TOEFL Board.

The TOEFL Board is comprised of 15 members. Some are affiliated with such institutions and agencies as undergraduate and graduate schools, community colleges, nonprofit educational exchange organizations, and other public and private agencies with an interest in international education. Other members are specialists in the field of English as a foreign or second language.

Development of the Test — The test originally contained five sections. As a result of extensive research, a three-section test was developed and introduced in 1976. In July 1995, the test item format was modified somewhat within the same three-section structure. In recent years, various constituencies called for a new TOEFL test that would (1) be more reflective of communicative competence models; (2) include more constructed-response tasks and direct measures of writing and speaking; (3) include tasks that integrate the language modalities tested; and (4) provide more information than the paper-based TOEFL test (TOEFL PBT) about the ability of international students to use English in an academic environment. Accordingly, the TOEFL Board initiated a broad effort under which language testing will evolve in the twenty-first century. The introduction of the computer-based TOEFL test (TOEFL CBT) in 1998 was the first incremental step in this broad test-improvement effort.

The next step was the introduction of an Internet-based version of the TOEFL test (TOEFL iBT) in September 2005. The test was first launched in the United States, and was gradually rolled out worldwide during 2005 and 2006. TOEFL iBT assesses all four language skills (speaking, listening, reading, and writing) that are important for effective communication. TOEFL iBT emphasizes integrated skills and provides better information to institutions about students' ability to communicate in an academic setting and their readiness for academic coursework.

As TOEFL iBT was introduced in an area, TOEFL CBT was discontinued after a period of overlap to ensure a smooth transition to TOEFL iBT. The final administration of TOEFL CBT was held in September 2006. TOEFL PBT will continue to be offered on a limited basis to support the TOEFL iBT testing network. This version of the TOEFL Test and Score Data Summary contains information about TOEFL iBT and TOEFL PBT test takers.

The TOEFL Internet-Based Test (TOEFL iBT)

TOEFL iBT was introduced in the United States in September 2005 and was gradually introduced worldwide during 2005 and 2006. TOEFL iBT was developed in response to a request by institutions to provide a

test that would measure nonnative speakers' ability to communicate in English in an academic setting.

TOEFL iBT:

- Measures the ability to communicate by combining all four language skills – Reading, Listening, Speaking, and Writing
- Is 100% academically-focused, measuring the kind of English used in academic settings
- Provides fair and objective scoring
- Provides valid and reliable information to support score users to make effective decisions

Test takers have up to four hours to complete the test, and all four sections are taken on the same day. The Reading section measures the ability to understand academic reading material, and the Listening section measures the ability to understand spoken English as it is used in colleges and universities. The Speaking section consists of six tasks that measure the ability to speak English in an academic setting. The Writing section consists of two tasks that measure the ability to write in a way that is appropriate for college and university course work. Some questions in the Speaking and Writing sections require the test takers to combine, or integrate, information from more than one source. For example, test takers are asked to read a passage, listen to a short lecture about a topic, and then speak or write in response. These integrated tasks are designed to simulate the academic experience.

Internet delivery enables ETS to deliver the test at official test centers in more locations. There are currently more than 4,000 test centers where the TOEFL iBT test is administered worldwide, and the number

continues to grow. Speaking and writing tasks are scored by multiple, rigorously trained raters who provide unbiased, objective evaluations of the responses via the Online Scoring Network.

Test Preparation—Everyone registered to take the TOEFL test receives test preparation materials free of charge. Examinees who register to take TOEFL iBT receive a link to a TOEFL iBT Sampler when the registration is complete. The Sampler includes questions from all four sections of TOEFL iBT. The Reading and Listening sections are interactive and sample responses are provided for the Writing and Speaking questions.

Several other test preparation products are available for free and for purchase. For more information about TOEFL iBT and related products, please visit the TOEFL Web site at www.ets.org/toefl.

Visit the TOEFL website at www.ets.org/toefl for the most up-to-date information.

Internet-Based Test Data for 2007

The data presented in the tables below are based on examinees who took the TOEFL iBT between January 2007 and December 2007.

Table 1 gives actual ranges of observed scores for the period from January 2007 and December 2007. The

percentile ranks for section and total scale scores are shown in **Table 2** for the total group. In **Tables 3–6**, examinees have been classified by their reason for taking the test (information supplied by them at the test center).

Tables 9 and 10 may be useful in comparing the performance on the TOEFL iBT of a particular student with that of other students from the same native country and with that of students who speak the same language. It is important to point out that the data do not permit the generalization that there are fundamental differences in the ability of the various national and language groups to learn English or in the level of English proficiency they can attain. The tables are based simply on the performance of those examinees native to particular countries and languages who happened to take TOEFL iBT.

Table 9. TOEFL iBT Total and Section Score Means¹—All Examinees Classified by Native Language²

The TOEFL Paper-Based Test (TOEFL PBT)

The paper-based version of the TOEFL test (TOEFL PBT) continues to be administered on specific dates in some countries, particularly in areas where accessibility to the Internet-based test (TOEFL iBT) is a concern. Each form of TOEFL PBT consists of three separately timed sections; the questions in each section are multiple choice, with four possible answers or options per question. All responses are gridded on answer sheets that are scored by computer. There is also a 30-minute essay, The Test of Written English (TWE), given at each administration.

- Section 1 of the test, Listening Comprehension, measures the ability to understand English as it is spoken in North America. The oral features of the language are stressed, and the problems tested include vocabulary and idiomatic expression as well as special grammatical constructions frequently used in spoken English. The stimulus material and oral questions are recorded in standard North American English; the response options are printed in the test books.
- Section 2, Structure and Written Expression, measures recognition of selected structural and grammatical points in standard written English. The language tested is formal, rather than conversational. The topics of the sentences are of a general academic nature so that individuals in specific fields of study or from specific national or linguistic groups have no particular advantage.
- Section 3, Reading Comprehension, measures the ability to read and understand short passages that are similar in topic and style to those that students are likely to encounter in North American colleges and universities. Examinees read a variety of short passages on academic subjects and answer several questions about each passage. The questions test information that is stated in or implied by the passage, as well as knowledge of some of the specific words as they are used in the passage.

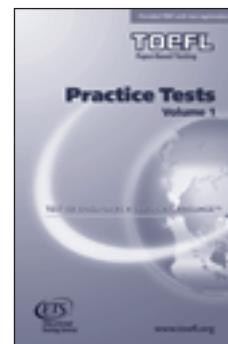

The total test time is approximately two and one-half hours; however, approximately three and one-half hours are needed for a test administration to admit examinees to the testing room, to allow them to enter identifying information on their answer sheets, and to distribute and collect the test materials.

Language specialists prepare the material for the TOEFL test. The TOEFL Committee of Examiners establishes overall guidelines for the test content and specifications. All item specifications, questions, and final test forms are reviewed for cultural and racial bias and content appropriateness, according to established ETS procedures.

For test date information, see the *Information and Registration Bulletin* for TOEFL PBT and TSE testing, or visit the TOEFL website at www.ets.org/toefl.

Test Preparation — Examinees registered to take TOEFL PBT receive *TOEFL Practice Tests*, Volume 1, which includes two complete PBT tests. In addition, sample questions are downloadable from the TOEFL website. There is no fee for these practice materials.

Other TOEFL test preparation products are available for purchase. For more information about these products and ordering information, go to the Test Takers section of the TOEFL website at www.ets.org/toefl.

Paper-Based Test Data for 2007

In 2007 TOEFL PBT was administered six times at preestablished testing centers throughout the world. The data presented below are based on candidates who took the paper-based TOEFL test between January and December 2007.

Table 11 gives actual ranges of observed scores for the period from January 2007 through December 2007. The percentile ranks for section and total scale scores are shown in **Table 12** for the total group. In **Tables 13–16**, examinees are classified by their reason for taking the test (information supplied by them at the test center).

**Based on examinees who responded to a question about gender group membership and also indicated a main reason for taking the TOEFL test.

Tables 19 and 20 may be useful in comparing the performance on the TOEFL PBT test of a particular student with that of other students from the same native country and with that of students who speak the same language. It is important to point out that the data do not permit the generalization that there are fundamental differences in the ability of the various national and language groups to learn English or in the level of English proficiency they can attain. The tables are based simply on the performance of those examinees native to particular countries and languages who happened to take the paper-based TOEFL test.

Table 19. TOEFL PBT Total and Section Score Means¹ — All Examinees Classified by Native Language²

¹ Because of the unreliability of statistics based on small samples, means are not reported for subgroups of less than 30.

² Because of changes in region and/or country boundaries, certain countries may have been added or deleted since the previous table was published.

Table 21 presents the overall percentile ranks of TWE® (*Test of Written English™*) scores. In 2007, the TWE test was administered with TOEFL PBT on all test dates. The TWE test is holistically scored using a criterion-referenced 6-point score scale. Further information can be found in the *Test of Written English Guide*.

The TOEFL® test is the BEST measure of academic English proficiency.

Using a high-quality test means more accurate decisions. ETS's in-depth, rigorous test design process ensures that the TOEFL® test is the highest-quality English-language proficiency assessment available.

The test is supported by 135+ TOEFL research reports and monographs, multiple pilot tests and our commitment to ongoing research.
