

*ets solutions

Built for efficiency.
Backed by expertise.
Trusted by government.

The ETS Solutions assessment platform brings together configurable technology, psychometric expertise, and AI-powered security to deliver more efficient, secure testing. Designed for public sector needs, it supports high-volume delivery, reduces administrative burden, and empowers agencies with connected data to inform decisions and long-term strategy.

Streamline every stage of
the assessment lifecycle

Register

A seamless registration and scheduling experience, integrated with your choice of test driver and delivery method.

Build

Off-the-shelf or custom content, backed by secure item banking, content management, and psychometric validation.

Deliver

Flexible delivery across audited test centers and secure remote proctoring – all with multi-layered AI security and full compliance.

Analyze

Real-time dashboards, program analytics, and data forensics help you monitor performance and spot security risks.

Score

AI-enabled or hybrid scoring options with human oversight, audit trails, and full transparency built in.

Report

Standard or custom reporting at both program and candidate level, with expert support to interpret and act on results.

Designed for government use

This platform is developed for public sector programs. Three core enablers underpin every stage of the lifecycle:

AI-enhanced

From identity verification and proctoring to analytics and scoring, AI strengthens security, increases accuracy, and improves decision-making.

Federal-grade security

Biometric ID checks, deepfake detection, and full alignment with federal and international standards – including SOC 2, ISO 27001, and FedRAMP-ready status.

Research-backed

Our solutions are developed with the ETS Research Institute and supported by our advisory service, ensuring your assessments are evidence-based, psychometrically sound, and policy-aligned.

Flexible solutions

Whether you're building from scratch or optimizing an existing program, our platform adapts to your needs.

Modular:

Select the capabilities you need and integrate with existing systems.

Integrated:

Unlock the full power of end-to-end assessment, with connected data that drives strategy, streamlines operations, and improves outcomes.

Drive efficiency across your assessment lifecycle

ETS Solutions helps federal agencies test smarter, with security, scale, and insight built in.

Why integration matters

The power of our solution lies in its **connected infrastructure**. Each module feeds into the next, unlocking more **intelligent workflows and greater value**:

Delivery data informs security strategy and candidate support.

Scoring and psychometrics inform future content development.

Analytics and reporting help optimize your program over time.

Together, these insights support more agile, evidence-based decision-making. Reducing friction, strengthening outcomes, and futureproofing your assessment programs.
