Overview

This report provides volume and performance information for test takers who took the *GRE*® revised General Test between July 1, 2014, and June 30, 2015. The report also provides volume information for the GRE revised General Test population between July 1, 2012, and June 30, 2015. The report is intended to help GRE score users understand the scores they receive and to encourage appropriate score use. The GRE Board and Program are committed to communicating the appropriate use of GRE scores to GRE score users, and score use guidelines are included in this report. Readers are also encouraged to review the *Guidelines for the Appropriate Use of Scores* at **www.ets.org/gre/guidelines**. The GRE Board and Program have long been dedicated to the principles of fairness and equity, and this report includes information about the steps that ETS takes to ensure fairness in GRE tests.

The GRE® revised General Test

On August 1, 2011, the GRE revised General Test replaced the *GRE*[®] General Test. Like the prior test, the revised test measures verbal reasoning, quantitative reasoning, critical thinking, and analytical writing skills required for success in graduate and business school. The test is composed of three measures: Verbal Reasoning, Quantitative Reasoning, and Analytical Writing. Scores for the Verbal Reasoning and Quantitative Reasoning measures are reported on a scale from 130–170, in 1-point increments, while the Analytical Writing measure is reported on a scale from 0–6, in half-point increments.

GRE test scores can be used by admissions and fellowship panels to supplement undergraduate records and other qualifications for graduate-level study. The scores provide common measures for comparing the qualifications of applicants from around the world and aid in the evaluation of grades and recommendations.

The Data

It should be noted that the terms *test takers* and *examinees* are used interchangeably throughout this report. The data used in the analyses were based on test takers who took the GRE revised General Test between July 1, 2012, and June 30, 2015. The data used in the analyses of test-takers' performance information were based on test takers who took the test between July 1, 2014, and June 30, 2015. The data used in the analyses of test-takers' performance information were based on test takers who took the test between July 1, 2014, and June 30, 2015. The data used in the analyses of test volumes from July 2012 through June 2015 were based on three testing years: July 1, 2012, to June 30, 2013 (2012–13), July 1, 2013, to June 30, 2014 (2013–14), and July 1, 2014, to June 30, 2015 (2014–15).

In each testing year, the data were refined to include only test takers with valid scores on all three measures. Then, if a test taker had more than one set of GRE revised General Test scores, the test taker's most recent scores were used and the previous scores were removed from the analysis, which allowed for a more accurate description of the test-taker population and its characteristics. This resulted in a total of 536,352, 574,132, and 576,220 test takers respectively, in 2012–13, 2013–14, and 2014–15 with valid, reportable scores on the test.¹ In each of the three testing years, approximately 98 percent of the test takers took the computer-delivered version of the test, while two percent took the paper-delivered version.

¹ Due to data refreshment, the numbers of test takers for testing years 2012–13 and 2013–14 included in this report are slightly different from those published in previous editions of "A Snapshot of Individuals Who Took the *GRE*® revised General Test."

The data summarized in this document comes from the background information questionnaire that test takers are asked to complete during the registration process. Since they are not required to answer all of these questions, the number of respondents to each of the background questions can vary. For example, more test takers complete the question about gender than the question about racial/ethnic group membership. Even though not all test takers provide background information, the size of the GRE population is sufficiently large enough to report demographic factors of primary interest.

Appropriate Use of This Document

These data can be used to learn more about the backgrounds of test takers, as well as some factors that relate to their performance on the GRE revised General Test. Users of this information should be careful not to generalize this information. For example, while the GRE revised General Test provides accurate scores at the individual level, it is not appropriate for comparing countries. The GRE Program does not endorse the practice of ranking countries on the basis of GRE scores, as this is a misuse of data.

The data in this report are not meant to be representative of the undergraduate population intending to attend graduate school, nor does this report represent the characteristics and performance of enrolled graduate students. The results provided in this report represent a view of examinees who took the GRE revised General Test. These factors should be considered as this report and future reports are reviewed.

Mean scores by gender, ethnic group, age, intended graduate major field, and test-taker group within major field are included in this document. In addition, information about test takers who selected M.B.A. as their intended degree objective is included. To the extent that there are differences in test scores both within and across the groups under analysis, the differences can result from factors such as variation in course-taking patterns, interests, knowledge, and skills, or differential educational, economic, and social systems in which everyone does not receive equal opportunity.

Appropriate Use of GRE Test Scores

GRE test scores are appropriately used as one factor in the selection of applicants for admission to graduate and business programs or recipients of graduate fellowships. Scores may also be used diagnostically for guidance and counseling.

Scores are most effectively used when validation evidence for score use and interpretation is available to document the relationship of different score levels to success in the graduate program. Such evidence may be obtained from a single program or may be based on combined evidence from similar programs.

Validity studies should be used to determine the validity of GRE test scores for identified appropriate uses and interpretations. Programs interested in conducting a validity study may contact the GRE Program (gretests@ets.org or 1-609-683-2002) for assistance with the technical aspects of conducting such a study.

Within the context of appropriate test use, the following guidelines should be followed:

• Test scores should always be used along with other sources of information, such as course grades, letters of recommendation, personal statements, samples of academic work, or professional experience.

- A cut-off score (i.e., a minimum score) should never be used as the only criterion for denial of admission or awarding of a fellowship.
- The Verbal Reasoning, Quantitative Reasoning, and Analytical Writing scores should be treated as three separate and independent pieces of information. They should not be combined into a single score.
- Scores on the Analytical Writing measure should be expressed on the 0–6 scale on which the measure is scored. They should not be equated to the scores on the Verbal Reasoning and Quantitative Reasoning measures because the scales are not comparable.
- Decisions about applicants should not be based on small score differences, due to the inherent uncertainty in all forms of measurement. Standard errors of measurement vary by test and are available in the *GRE® Guide to the Use of Scores*, which can be downloaded at www.ets.org/gre/guide.
- GRE scores should not be used as a credential to grant a degree, to offer course credit by examination, or for advancement to candidacy.

Steps That ETS Takes to Ensure Fairness

ETS has designed several procedures to build fairness into its tests: a) involving external faculty members in the design and oversight of the tests; b) using a fairness review process; and c) conducting differential item functioning (DIF) analyses. This multifaceted approach ensures that an array of information is considered in the development and review of test questions and test services.

Involving External Faculty Members in the Design and Oversight of the Test

The purpose of involving faculty members in the design and oversight of the test is to make sure that the perspectives of a diverse group of people are considered in planning and ongoing operational activities. In this effort, the GRE Program involves undergraduate and graduate faculty members through the GRE Technical Advisory Committee, which is composed of men and women from different academic disciplines and who represent a variety of ethnic groups. Drawing on a diverse group of educators, who are not ETS employees, is one way ETS seeks to ensure the fairness of the GRE test. In addition, faculty members from various minority groups contribute reading comprehension passages and questions, analytical writing prompts, and other question types; the pool of outside reviewers of GRE test questions and GRE essays also includes minority group faculty members.

Fairness Review

The purpose of the ETS fairness review process is to ensure that tests reflect the multicultural nature of society, and to screen out any material that might be offensive or less accessible to major subgroups of test takers, such as those based on age, disability, ethnic group, race, or gender. Every question on an ETS test (and all materials published by ETS) must pass a fairness review. This review is based on a set of written guidelines; each review is conducted by an ETS staff member specifically trained in the application of these guidelines. In addition, the GRE Program solicits reviews from external minority and female faculty members. Any test question that does not pass the fairness review must be revised to comply with the guidelines or

be removed from the test. The fairness review does not guarantee that women, minority group members or individuals with disabilities will perform well on the test, but it does guard against the possibility of distraction caused by language or content that might be found offensive or inaccessible.

DIF Analysis

Differential item functioning (DIF) occurs when people in different groups who have approximately equal knowledge and skill perform in substantially different ways on a particular test question. The purpose of a DIF analysis is to identify any test question on which members of a particular group of test takers perform differently than would be expected on the basis of their overall ability in the areas covered by the test. DIF analysis is a statistical technique used as part of the try-out process that is designed to identify test questions that are more difficult for members of one group than for members of another group, after controlling for the examinees' overall ability. It is important to realize that DIF is not synonymous with bias. DIF may occur if a perfectly fair question happens to be mastering a skill that is not well represented in the test as a whole. In a DIF analysis, a DIF statistic is computed for each question, indicating the extent to which members of one group perform differently from members of another group who have similar ability levels. Any questions that exhibit large group differences will not be included in the test, unless the question is considered essential for the test's content coverage. In addition, ETS has produced a set of guidelines, based on many years of research related to DIF statistics that identifies several content categories of questions that are associated with differential difficulty for gender or minority groups. ETS prohibits, for skills tests, further use of questions in those categories, regardless of the DIF performance of particular questions in those categories.

The GRE Program encourages test takers to report concerns about specific test questions directly to the test center administrator or to the GRE Program immediately following the test administration. Subject matter specialists will review these questions and eliminate them from scoring if potential bias is determined. The test specialists will also respond in writing to the examinees. If a response does not resolve an examinee's concern, the examinee may pursue the matter further with ETS.

Examinee Population

Table 1.1 shows that 50 percent of the examinees were women and 46 percent were men.

Table 1.1. GRE revised General Test Score Information, Examinee Population							
	Verbal Quantitative Analytical Reasoning Reasoning Writing						
Mean	149.9	152.5	3.5				
Standard Deviation (SD)	8.5	9.0	0.9				
Number of Examinees (N)	576,220						
Percent Men	46						
Percent Women	50						

Note: Four percent of examinees did not provide any gender classification.

U.S. Citizenship Status and Racial/Ethnic Group

Table 1.2 shows that non-U.S. citizens represented 43 percent of the GRE revised General Test examinee population. The table also shows that non-U.S. citizens had a higher mean score than U.S. citizens on the Quantitative Reasoning measure and lower mean scores on the Verbal Reasoning and the Analytical Writing measures.

The table also shows that for non-U.S. citizens, men had a higher mean score on the Quantitative Reasoning measure and women had higher mean scores on the Verbal Reasoning and Analytical Writing measures. For U.S. citizens, men had higher mean scores than woman on all three measures of the GRE revised General Test.

For the total group of test takers, men had a higher mean Quantitative Reasoning score than women, and women had higher mean Verbal Reasoning and Analytical Writing scores than men.

Table 1.2. GRE revised General Test Score Information, by U.S. Citizenship Status and Gender								
					itative oning	Analy Writ		
Group	Ν	Percent	Mean	SD	Mean	SD	Mean	SD

Men	2,020	<1	149.6	8.7	155.1	8.9	3.3	0.9
Women	2,848	<1	150.3	7.6	151.1	8.5	3.6	0.8
No Response	240	<1	151.9	8.0	150.6	8.0	3.6	0.8
Total	576,220	100	149.9	8.5	152.5	9.0	3.5	0.9
Men	264,008	46	149.4	9.0	154.7	9.1	3.3	0.9
Women	289,866	50	150.1	8.0	150.7	8.5	3.6	0.8
No Response	22,346	4	152.7	8.4	151.2	8.5	3.7	0.8

Note: The group Non-U.S. Citizens is determined by examinees who indicated a country of citizenship other than the United States. The number under the percent column represents the percentage of total test takers (576,220) who were within each of the identified groups. Due to rounding, percentages may not add up to 100.

U.S. Citizenship Status and Racial/Ethnic Group (continued)

Table 1.3 shows that for both U.S. men and women, test takers who classified themselves as Asian, on average, obtained a higher Quantitative Reasoning score than any other racial/ethnic group. Test takers who classified themselves as White (non-Hispanic), on average, obtained higher Verbal Reasoning scores than other racial/ethnic groups. Test takers who classified themselves as White (non-Hispanic) or Asian scored higher on the Analytical Writing measure than other racial/ethnic groups.

Women	192,577	59	151.8	7.5	148.6	7.1	3.8	0.8
No Response	17,826	5	153.8	7.9	150.5	8.0	3.9	0.8

Note: A total of 325,821 U.S. citizens took the GRE revised General Test between July 1, 2014, and June 30, 2015. The percentages for the overall Racial/Ethnic groups were based on this total group of test takers; the percentages for the gender groups within each Racial/Ethnic group were based on the group of test takers who were within the particular Racial/Ethnic group.

Racial/Ethnic groups are defined as follows: **American Indian**-American Indian or Alaskan Native; **Asian**-Asian or Asian American; **Hawaiian/Pacific Islander**-Native Hawaiian or other Pacific Islander; **Black**-Black or African American; **Mexican**-Mexican, Mexican American, or Chicano; **Puerto Rican**-Puerto Rican; **Other Hispanic**-Other Hispanic, Latino, or Latin American; **White**-White (non-Hispanic); **Other**-Other

U.S. Citizenship Status and Racial/Ethnic Group (continued)

Table 1.4 shows that test takers whose graduate degree objective was an M.B.A., and who classified themselves as Asian, had a higher mean Quantitative Reasoning score than other racial/ethnic groups. Test takers who classified themselves as White (non-Hispanic) had a higher mean Verbal Reasoning score than other racial/ethnic groups. Test takers who classified themselves as Asian or White (non-Hispanic) had higher Analytical Writing scores than other racial/ethnic groups.

Table 1.4. GRE revised General Test Score Information for Examinees with M.B.A. as Graduate Degree Objective, by Racial/Ethnic Group (U.S. Citizens)

			Verbal Reasoning		Quant Reaso		Analytical Writing

Total	10,073	100	151.7	7.7	149.4	7.3	3.8	0.8			

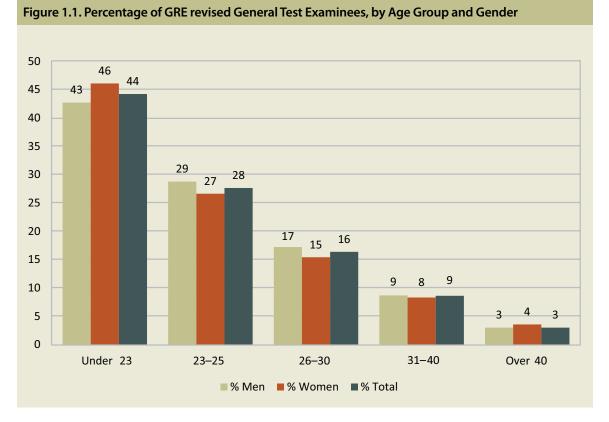

Note: This analysis is based on a total of 10,073 U.S. citizens with M.B.A. as their intended graduate major who took the GRE revised General Test between July 1, 2014, and June 30, 2015.

Racial/Ethnic groups are defined as follows: **American Indian**-American Indian or Alaskan Native; **Asian**-Asian or Asian American; **Hawaiian/Pacific Islander**-Native Hawaiian or other Pacific Islander; **Black**-Black or African American; **Mexican**-Mexican, Mexican American, or Chicano; **Puerto Rican**-Puerto Rican; **Other Hispanic**-Other Hispanic, Latino, or Latin American; **White**-White (non-Hispanic); **Other**-Other

Age Group and Gender

Figure 1.1 shows that the majority of examinees (88 percent) were 30 years of age or younger.

Note: These analyses were based on a total of 576,220 test takers. The percentages in the figure above represent the percentage of test takers within a particular gender category (e.g., women) or test takers in the total groups who were in a particular age range. Due to rounding, percentages may not add up to 100.

Age Group and Gender (continued)

Table 1.5 shows that for both men and women, generally, examinees older than 25 years of age had higher mean Verbal Reasoning scores than examinees younger than 25 years of age.

On the Quantitative Reasoning measure, for both men and women, older examinees had lower mean scores than younger examinees. In addition, men consistently had a higher mean score than women on the Quantitative Reasoning measure across all age groups.

On the Analytical Writing measure, younger women performed better than older women on average, while men performed similarly across all age groups. In addition, women examinees performed the same or better than men across all age groups, on average.

Note: A total of 576,220 examinees took the GRE revised General Test between July 1, 2014, and June 30, 2015. The percentages for the overall age groups were based on this total group of test takers; the percentages for the gender groups within each age group were based on the group of test takers who were within the particular age group. Statistics are not reported for groups with fewer than 30 examinees.

Age Group and Gender (continued)

Table 1.6 shows that for examinees whose graduate degree objective was M.B.A., younger examinees had higher mean Quantitative Reasoning and Analytical Writing scores than older examinees.

Table 1.6. GRE re Objective, by Ag		ral Test Sco	re Informat	ion for Exa	minees witl	n M.B.A. as	Graduate D	egree	
			Verbal Reasoning			Quantitative Reasoning		Analytical Writing

Age Group and Gender (continued)

Table 1.8 shows information about examinees who tested in the United States, India, and Mainland China. The table shows that India (61 percent) and Mainland China (71 percent) had a substantially higher percentage of test takers between the ages of 18 and 22 than the U.S. (41 percent). India and Mainland China had a lower percentage of test takers who were 26 or older than the U.S..

A Snapshot of the Individuals Who Took the GRE® revised General Test

Major Fields

The tables and figures on undergraduate major field and intended graduate major fields refer to the Major Fields listed below:

Business

Accounting Banking and Finance Business Administration and Management

Education

Administration Curriculum and Instruction Early Childhood Education Elementary Education Evaluation and Research Higher Education Secondary Education Special Education Student Counseling and Personnel Services

Engineering

Chemical Engineering Civil Engineering Electrical and Electronic Engineering Industrial Engineering Materials Engineering Mechanical Engineering

Humanities and Arts

Arts English Language and Literature Foreign Languages and Literatures History Philosophy

Life Sciences

Agriculture Biological Sciences Health and Medical Sciences

Physical Sciences

Chemistry Computer and Information Sciences Earth, Atmospheric, and Marine Sciences Mathematical Sciences Physics and Astronomy

Social Sciences

Anthropology and Archaeology Economics Political Science Psychology Sociology

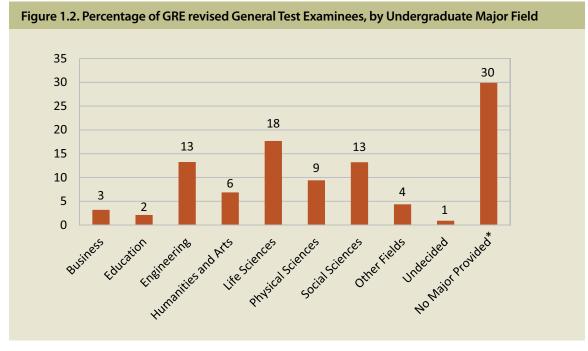

Other Fields

Architecture and Environmental Design Communications Home Economics Library and Archival Sciences Public Administration Religion and Theology Social Work Other

Note: For a more detailed list of major fields, go to www.ets.org/gre/gradmajorfields.

Undergraduate Major Field

Figure 1.2 shows that, overall, the most commonly reported undergraduate major fields were within Life Sciences (18 percent), followed by Social Sciences (13 percent) and Engineering (13 percent).

Note: See page 23 for a list of major fields. These analyses were based on a total of 576,220 test takers.

*Test takers in the "No Major Provided" category include those test takers who indicated their undergraduate major as "Any Department Not Listed," those who did not respond to the question, and those who provided an invalid answer.

Undergraduate Major Field (continued)

Table 1.10 shows that men and women indicating an undergraduate major in the field of Humanities and Arts had higher mean scores on the Verbal Reasoning and Analytical Writing measures than men and women in other major fields. Men and women indicating an undergraduate major in Engineering had a higher mean score on the Quantitative Reasoning measure than men and women in other major fields.

Men	264,008	46	149.4	9.0	154.7	9.1	3.3	0.9					
Women	289,866	50	150.1	8.0	150.7	8.5	3.6	0.8					
No Response	22,346	4	152.7	8.4	151.2	8.5	3.7	0.8					

Note: See page 23 for a list of major fields. A total of 576,220 examinees took the GRE revised General Test between July 1, 2014, and June 30, 2015. The percentages for the overall undergraduate major fields were based on those total groups of test takers; the percentages for the gender groups within each undergraduate major group were based on the group of test takers who were within the particular undergraduate major group.

*Test takers in the "No Major Provided" category include those who indicated their undergraduate major as "Any Department Not Listed," those who did not respond to the background question, and those who provided an invalid answer.

Intended Graduate Major Field

Figure 1.3 shows that the percentage of men who indicated an intended graduate major in Engineering and the Physical Sciences was significantly higher than the percentage of women indicating those intended graduate majors. The percentage of women who indicated an intended graduate major in the Life Sciences was significantly higher than the percentage of men indicating an intended graduate major in Life Sciences. In Social Sciences and Education, the percentage of women exceeded the percentage of men indicating those intended graduate majors. The percentages of men and women indicating an intended graduate major in Life Sciences.

Note: See page 23 for a list of major fields. These analyses were based on a total of 576,220 test takers. The percentages in the figure above represent the percentage of test takers within a particular gender category (e.g., men, women) for each intended graduate major field.

*Test takers in the "No Major Provided" category include those who indicated their intended graduate major as "Any Department Not Listed," those who did not respond to the question, and those who provided an invalid answer.

Intended Graduate Major Field (continued)

Table 1.11 shows that men and women indicating an intended graduate major in the field of Humanities and Arts had higher mean Verbal Reasoning and Analytical Writing scores than men and women in other majors. Men and women with an intended graduate major in Engineering had higher mean scores on the Quantitative Reasoning measure than men and women in other majors.

Note: See page 23 for a list of major fields. A total of 576,220 examinees took the GRE revised General Test between July 1, 2014, and June 30, 2015. The percentages for the overall intended graduate major fields were based on those total groups of test takers; the percentages for the gender groups within each intended graduate major group were based on the group of test takers who were within the particular intended graduate major group.

*Test takers in the "No Major Provided" category include those test takers who indicated their intended graduate major as "Any Department Not Listed," those who did not respond to the question, and those who provided an invalid answer.

Intended Graduate Major Field (continued)

Table 1.12 shows that across all racial/ethnic groups, test takers with an intended graduate major in Humanities and Arts had a higher mean score on the Verbal Reasoning measure than those with other intended graduate majors.

Note: See page 23 for a list of major fields. A total of 325,821 U.S. citizens took the GRE revised General Test between July 1, 2014, and June 30, 2015. Statistics for groups with less than 30 examinees were not reported. Racial/Ethnic groups are defined as follows: American Indian-American Indian or Alaskan Native; Asian-Asian or Asian American; Hawaiian/Pacific Islander-Native Hawaiian or other Pacific Islander; Black-Black or African American; Mexican-Mexican, Mexican American, or Chicano; Puerto Rican-Puerto Rican; Other Hispanic-Other Hispanic, Latino, or Latin American; White-White (non-Hispanic); Other-Other

*Test takers in the "No Major Provided" category include those test takers who indicated their intended graduate major as "Any Department Not Listed," those who did not respond to the question and those who provided an invalid answer.

A Snapshot of the Individuals Who Took the GRE® revised General Test

Intended Graduate Major Field (continued)

Table 1.13 shows that test takers across all racial/ethnic groups with an intended graduate major in Engineering had a higher mean score on the Quantitative Reasoning measure than those with other majors.

Note: See page 23 for a list of major fields. A total of 325,821 U.S. citizens took the GRE revised General Test between July 1, 2014, and June 30, 2015. Statistics for groups with less than 30 examinees were not reported. Racial/Ethnic groups are defined as follows: American Indian-American Indian or Alaskan Native; Asian-Asian or Asian American; Hawaiian/ Pacific Islander-Native Hawaiian or other Pacific Islander; Black-Black or African American; Mexican-Mexican, Mexican American, or Chicano; Puerto Rican-Puerto Rican; Other Hispanic-Other Hispanic, Latino, or Latin American; White-White (non-Hispanic); Other-Other

*Test takers in the "No Major Provided" category include those test takers who indicated their intended graduate major as "Any Department Not Listed," those who did not respond to the question, and those who provided an invalid answer.

A Snapshot of the Individuals Who Took the GRE® revised General Test

Graduate Degree Objective

Table 1.15 shows that about 67 percent of examinees reported a graduate degree objective of either master's degree (41 percent) or doctorate (26 percent). A total of 29 percent of examinees did not respond to this question.

Table 1.15. Percentage of GRE revised General Te	st Examinees, by Gradu	ate Degree Objective
Graduate Degree Objective	Number	Percent
Master's (M.A., M.S., M.Ed.)	237,870	41
Intermediate (such as Specialist)	2,662	<1
M.B.A.	14,208	2
Doctorate (Ph.D., Ed.D.)	147,772	26
Postdoctoral Study	5,631	1
Non-Degree Graduate Study	846	<1
Not Currently Planning Graduate Study	999	<1
No Response	166,232	29
Total	576,220	100

Enrollment Preference

Table 1.16 shows that 62 percent of test takers planned to enroll in a full-time graduate or business school program. These test takers had a higher mean Quantitative Reasoning score and a lower mean Verbal Reasoning score than test takers who planned to enroll part time or who were undecided. A total of 29 percent of examinees did not respond to this question.

Table 1.16. GRE revised General Test Score Information, by Enrollment Preference										
Enrollment			Verbal Reasoning		Quantitative Reasoning		Analytical Writing			
Preference	Ν	Percent	Mean	SD	Mean	SD	Mean	SD		
Full Time	356,886	62	150.5	8.3	152.4	8.7	3.6	0.9		
Part Time	25,036	4	151.1	7.8	148.1	7.9	3.6	0.8		
Undecided	28,618	5	151.0	8.8	151.0	8.4	3.6	0.9		
No Response	165,680	29	148.2	8.8	153.8	9.7	3.2	0.9		
Total	576,220	100	149.9	8.5	152.5	9.0	3.5	0.9		

Table 1.17 shows that 67 percent of the test takers who indicated M.B.A. as their graduate degree objective planned to enroll in a full-time business program. These test takers had a higher mean Quantitative Reasoning score and lower mean Verbal Reasoning and Analytical Writing scores than test takers who planned to enroll part time.

Table 1.17. GRE revised General Test Score Information for Examinees with M.B.A. as Graduate Degree Objective, by Enrollment Preference											
Enrollment			Verbal Reasoning			Quantitative Reasoning		ytical ting			
Preference	N	Percent	Mean	SD	Mean	SD	Mean	SD

Full-Time Work Experience

Table 1.18 shows that 51 percent of test takers had two years of full-time work experience or less. On average, test takers with more years of full-time work experience had higher Verbal Reasoning scores than those with fewer years of full-time work experience. Test takers with fewer years of full-time work experience had higher Quantitative Reasoning scores. Approximately 34 percent of test takers did not respond to this question.

Table 1.18. GRE revised General Test Score Information, by Years of Full-Time Work Experience											
			Verbal Reasoning			itative oning	Analytical Writing				
Years of Full-Time Work Experience	N	Percent	Mean	SD	Mean	SD	Mean	SD			
Less than 1 Year	206,624	36	150.5	8.1	152.7	8.7	3.6	0.8			
1–2 Years	87,894	15	150.4	8.3	151.9	8.5	3.6	0.8			
3–4 Years	37,575	7	150.5	8.7	151.4	8.5	3.5	0.9			
5–7 Years	23,005	4	151.6	8.6	150.4	8.3	3.6	0.9

Total	576,220	100	149.9	8.5	152.5	9.0	3.5	0.9			

Full-Time Work Experience (continued)

Table 1.19 shows that 53 percent of test takers who indicated M.B.A. as their graduate degree objective had two years of full-time work experience or less. On average, test takers who had five to 10 years of full-time work experience obtained higher Verbal Reasoning scores than test takers with fewer or more years of full-time work experience. Test takers who had 10 years or less full-time work experience had higher mean Quantitative Reasoning scores.

Table 1.19. GRE revised General Test Score Information for Examinees with M.B.A. as Graduate Degree Objective, by Years of Full-Time Work Experience

Degree Objective, by reals of Full-Time work Experience											
Years of Full-Time			Verbal Reasoning		Quantitative Reasoning		Analytical Writing				
Work Experience	Ν	Percent	Mean	SD	Mean	SD	Mean	SD			
Less than 1 Year	3,931	28	149.1	7.9	150.4	8.5	3.5	0.9			
1–2 Years	3,513	25	149.6	8.1	149.9	8.0	3.6	0.9

Total	14,208	100	150.2	8.3	150.2	8.1	3.6	0.9			

Program Format

Table 1.20 shows that 57 percent of test takers indicated they would like to pursue a graduate or business degree on campus. On average, these test takers had higher mean scores on the Verbal Reasoning, Quantitative Reasoning and Analytical Writing measures than test takers who planned to pursue a degree online or through a combination of on-campus and online courses. Approximately 31 percent of examinees did not respond to this question.

Table 1.20. GRE revised General Test Score Information, by Program Format										
			Verbal Reasoning		Quantitative Reasoning		Analytical Writing			
Program Format	N	Percent	Mean	SD	Mean	SD	Mean	SD		
On Campus	326,687	57	150.8	8.4	152.7	8.6	3.6	0.9		
Online	13,341	2	149.9	7.5	147.2	8.0	3.5	0.8

Program Format (continued)

Table 1.21 shows that 68 percent of test takers with M.B.A. as their graduate degree objective indicated they would like to pursue the degree on campus. On average, those test takers had higher mean scores on the Verbal Reasoning, Quantitative Reasoning and Analytical Writing measures than test takers who planned to pursue a degree online or through a combination of on-campus and online courses.

Table 1.21. GRE revised General Test Score Information for Examinees with M.B.A. as Graduate Degree Objective, by Program Format											
			Verbal Reasoning		Quantitative Reasoning		Analytical Writing				
Program Format	Ν	Percent	Mean	SD	Mean	SD	Mean	SD

U.S. Citizenship Status and Racial/Ethnic Group

Figure 2.1 shows that in testing years 2012–13, 2013–14 and 2014–15, there were more test takers who were U.S. citizens than non-U.S. citizens. From 2012–13 to 2014–15, the number of test takers who were U.S. citizens who took the test decreased, and the number of non-U.S. citizens who took the test increased.

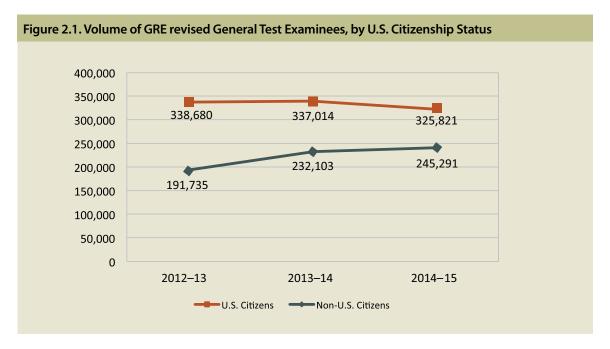

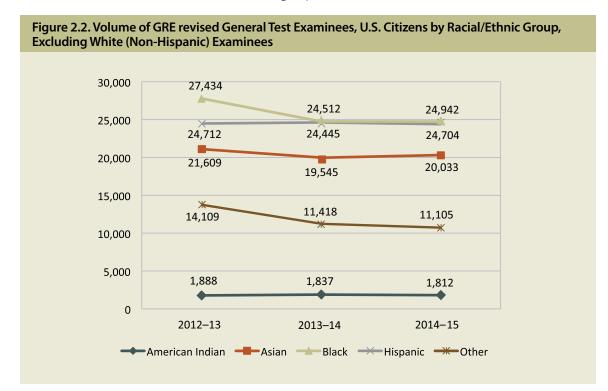

Table 2.1 shows that the percentage of test takers who were U.S. citizens decreased from 63 percent in 2012–13 to 57 percent in 2014–15. The percentage of test takers who were non-U.S. citizens increased from 36 percent in 2012–13 to 43 percent in 2014–15.

Table 2.1. Volume of GRE revised General Test Examinees, by U.S. Citizenship Status										
	2012	2–13	2013	3–14	2014–15					
U.S. Citizenship Status	Ν	Percent	Ν	Percent	Ν	Percent				
U.S. Citizen	338,680	63	337,014	59	325,821	57				
Non-U.S. Citizen	191,735	36	232,103	40	245,291	43

Total	536,352	100	574,132	100	576,220	100				

.48

U.S. Citizenship Status and Racial/Ethnic Group (continued)

Excluding White (Non-Hispanic) test takers, Figure 2.2 shows that in testing years 2012–13, 2013–14, and 2014–15, test takers who classified themselves as Black were the largest racial/ethnic group, followed by test takers who classified themselves as Hispanic, Asian, and American Indian, respectively. From testing year 2013–14 to 2014–15, the number of test takers in Black, Hispanic, Asian racial/ethnic groups increased, and the number of test takers in the American Indian group decreased.

Note: Racial/Ethnic groups are defined as follows: American Indian-American Indian or Alaskan Native; Asian-Asian or Asian American, Native Hawaiian or other Pacific Islander; Black-Black or African American; Hispanic-Mexican, Mexican American, or Chicano, Puerto Rican, and Other Hispanic, Latino, or Latin American; Other-Other

U.S. Citizenship Status and Racial/Ethnic Group (continued)

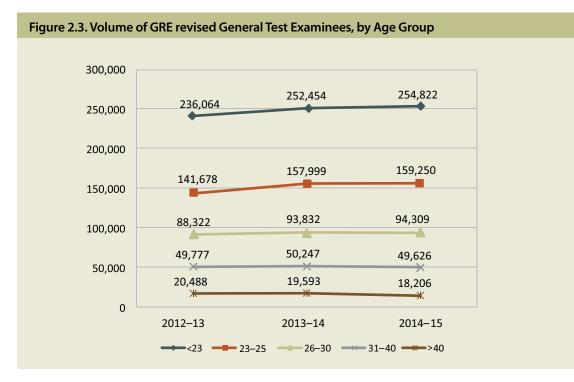

Table 2.2 shows that from testing year 2012–13 to 2014–15, the percentages of test takers who identified themselves as White (non-Hispanic) decreased from 68 percent to 59 percent. The percentages for test takers in other racial/ethnic groups remained stable. Note that in testing year 2014–15, approximately 15 percent of the test takers did not respond to this question.

Table 2.2. Volume of GRE revised General Test Examinees, by Racial/Ethnic Group (U.S. Citizens)									
Racial/Ethnic	2012	2–13	2013	3–14	2014	2014–15			
Group	Ν	Percent	Ν	Percent	Ν	Percent			
American Indian	1,888	1	1,837	1	1,812	1			
Asian	20,557	6	18,593	6	19,171	6			
Hawaiian/Pacific Islander	1,052	<1	952	<1	862	<1			
Black	27,434	8	24,512	7	24,704	8			
Mexican	8,983	3	8,800	3	8,996	3			
Puerto Rican	3,095	1	3,132	1	3,219	1			
Other Hispanic	12,634	4	12,513	4	12,727	4

Other	14,109	4	11,418	3	11,105	3			
No Response	18,023	5	54,792	16	50,393	15			
Total	338,680	100	337,014	100	325,821	100			

Note: Racial/Ethnic groups are defined as follows: American Indian-American Indian or Alaskan Native; Asian-Asian or Asian American; Hawaiian/Pacific Islander-Native Hawaiian or other Pacific Islander; Black-Black or African American; Mexican-Mexican, Mexican American, or Chicano; Puerto Rican-Puerto Rican; Other Hispanic-Other Hispanic, Latino, or Latin American; White-White (non-Hispanic); Other-Other

Age and Gender

Figure 2.3 shows that in testing years 2012–13, 2013–14, and 2014–15, test takers under 23 years of age represented the largest group of test takers. From 2013–14 to 2014–15, the number of test takers in the under 23, 23 to 25, and 26 to 30 age groups increased, and the volume of test takers in the 31–40 and over 40 age groups remained relatively stable.

Age and Gender (continued)

Table 2.3 shows that in testing years 2012–13, 2013–14 and 2014–15, the largest group of test takers were between the ages of 18 and 30. From 2012–13 to 2014–15, the percentage of test takers in the 23 to 25 age group increased. The percentages of test takers in other age groups remained stable.

Table 2.3. Volume of GRE revised General Test Examinees, by Age Group									
	2012	2–13	2013	3–14	2014	1–15			
Age	Ν	Percent	Ν	Percent	Ν	Percent			
Under 18	169	<1	140	<1	156	<1			
18–22	235,895	44	252,314	44	254,666	44

Over 60	593	<1	589	<1	590	<1			
No Response	23	<1	7	<1	7	<1			
Total	536,352	100	574,132	100	576,220	100			

Age and Gender (continued)

Figure 2.4 shows that from testing years 2012–13 to 2014–15, there were more women test takers than men. From testing year 2012–13 to 2014–15, the number of men and women who took the test increased.

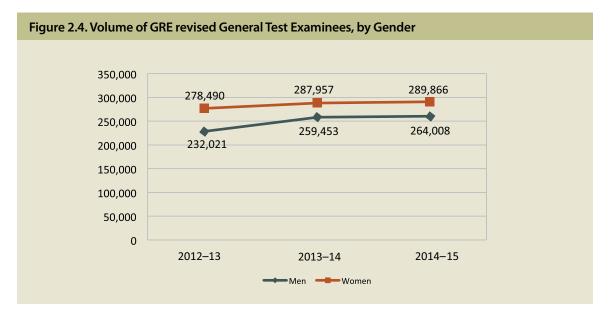

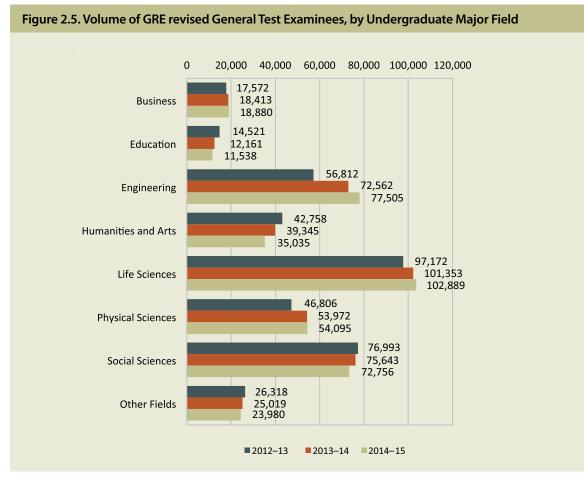

Table 2.4 shows that from 2012–13 to 2014–15, the percentage of male test takers increased and the percentage of female test takers decreased.

Table 2.4. Volume of GRE revised General Test Examinees, by Gender									
	2012	2–13	2013	3–14	2014–15				
Gender	Ν	Percent	Ν	Percent	Ν	Percent			
Men	232,021	43	259,453	45	264,008	46			
Women	278,490	52	287,957	50	289,866	50			
No Response	25,841	5	26,722	5	22,346	4			
Total	536,352	100	574,132	100	576,220	100			

Undergraduate Major Field

Figure 2.5 shows that from testing year 2012–13 to 2014–15, test takers who had an undergraduate major in the Life Sciences represented the largest group of test takers. The number of test takers whose undergraduate major was in the Life Sciences, Engineering, Physical Sciences, and Business increased. The number of test takers whose undergraduate major was in the Social Sciences, Humanities and Arts, and Education decreased.

Note: See page 23 for a list of major fields.

Undergraduate Major Field (continued)

Table 2.5 shows that from testing year 2012–13 to 2014–15, the percentage of test takers with undergraduate majors in Engineering increased, while the percentages of those in Education, Humanities and Arts, Social Sciences, and Other Fields decreased. The percentage of test takers in Business, Life Sciences, and Physical Sciences remained stable.

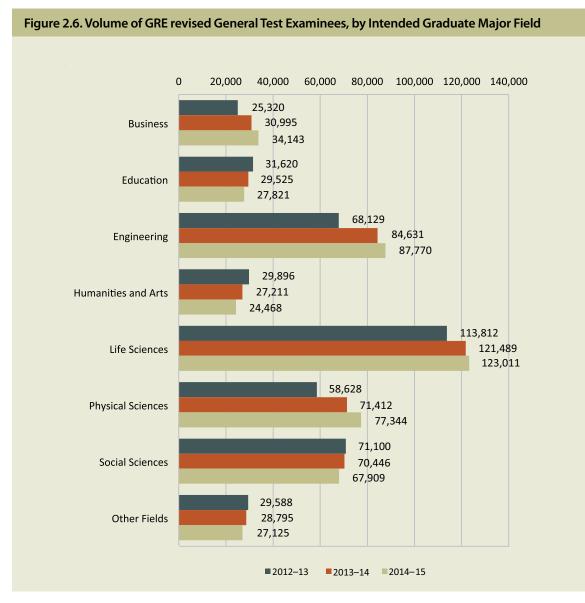

Table 2.5. Volume of GRE revised General Test Examinees, by Undergraduate Major Field										
	2012	2–13	2013	3–14	2014–15					
Undergraduate Major	Ν	Percent	Ν	Percent	Ν	Percent				
Business	17,572	3	18,413	3	18,880	3				
Education	14,521	3	12,161	2	11,538	2				
Engineering	56,812	11	72,562	13	77,505	13				
Humanities and Arts	42,758	8	39,345	7	35,035	6				
Life Sciences	97,172	18	101,353	18	102,889	18				
Physical Sciences	46,806	9	53,972	9	54,095	9				
Social Sciences	76,993	14	75,643	13	72,756	13				
Other Fields	26,318	5	25,019	4	23,980	4				
Undecided	4,670	1	5,211	1	5,416	1				
No Major Provided*	152,730	28	170,453	30	174,126	30				
Total	536,352	100	574,132	100	576,220	100				

Note: See page 23 for a list of major fields.

*"No Major Provided" includes those test takers who indicated their Undergraduate Major Field as "Any Department Not Listed," those who did not respond to the background question, and those who provided an invalid answer.

Intended Graduate Major Field

Figure 2.6 shows that from testing year 2012–13 to 2014–15, the number of test takers with intended graduate majors in the Life Sciences was the largest group. The number of test takers with intended graduate majors in the Life Sciences, Engineering, Physical Sciences, and Business increased. The number of test takers with intended graduate majors in the Social Sciences, Humanities and Arts, and Education decreased.

18

Note: See page 23 for a list of major fields.

Table 2.6 shows that from testing year 2012–13 to 2014–15, the percentages of all test takers with intended graduate majors in the Life Sciences, Engineering, Physical Sciences, and Business increased. The percentages of all test takers with intended graduate majors in the Social Sciences, Humanities and Arts, and Education decreased.

The percentages for male and female test takers within each intended graduate major remained stable across the three years. More women indicated an intended graduate major in Education, Life Sciences, Social Sciences, and Humanities and Arts than men. More men indicated an intended graduate major in Engineering, Physical Sciences, and Business than women.

	2014-15	264,008	46	289,866	50	22,346	4	576,220	100	

See page 23 for a list of major fields.

Note: The percentages for the overall intended graduate major fields were based on those total groups of test takers in each testing year; the percentages for the gender groups within each intended graduate major group were based on the group of test takers who were within the particular intended graduate major group in each testing year.

*"No Major Provided" includes those test takers who indicated their intended graduate major as "Any Department Not Listed," those who did not respond to the background question, and those who provided an invalid answer.

Table 2.7 shows that the racial/ethnic composition of the test-taker population was stable from testing year 2012–13 to 2014–15.

	2014-15	1,812	1	19,171	6	862	<1	24,704	8	8,996	3

Note: See page 23 for a list of major fields. Racial/Ethnic groups are defined as follows: American Indian-American Indian or Alaskan Native; Asian-Asian or Asian American; Hawaiian/Pacific Islander-Native Hawaiian or other Pacific Islander; Black-Black or African American; Mexican-Mexican, Mexican American, or Chicano; Puerto Rican-Puerto Ricar; Other Hispanic-Other Hispanic, Latino, or Latin American; White-White (non-Hispanic); Other-Other

The percentages for the overall intended graduate major fields were based on those total groups of test takers in each testing year; the percentages for the racial/ethnic groups within each intended graduate major field group were based on the group of test takers who were within the particular intended graduate major field group in each testing year. Due to rounding, the percentage within each graduate major field in a year may not add up to 100 percent.

*"No Major Provided" includes those test takers who indicated their intended graduate major as "Any Department Not Listed," those who did not respond to the background question, and those who provided an invalid answer.

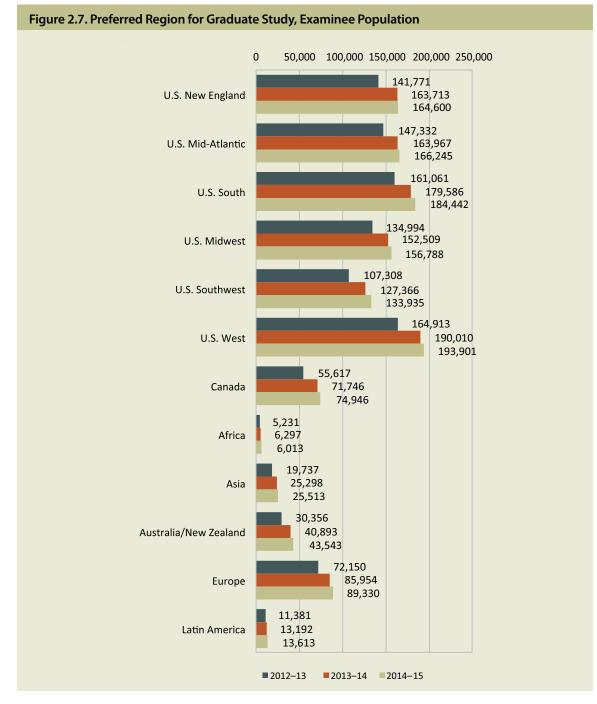

Current Educational Level

Table 2.8 shows that in testing years 2012–13, 2013–14, and 2014–15, the majority of test takers were seniors or unenrolled college graduates.

Table 2.8. Volume of GRE revised General Test Examinees, by Current Educational Level									
	2012	2–13	2013	3–14	2014	4–15			
Current Educational Level	Ν	Percent	Ν	Percent	Ν	Percent			
Sophomore	1,686	<1	1,609	<1	2,013	<1			
Junior	19,391	4	17,922	3	20,884	4			
Senior	183,351	34	192,917	34	192,018	33

Total	536,352	100	574,132	100	576,220	100			

Preferred Region for Graduate Study

Figure 2.7 shows that in testing years 2012–13, 2013–14, and 2014–15, test takers showed the most interest in studying in a U.S. region. For non-U.S. regions, test takers showed the most interest in studying in Europe and Canada.

Note: Figure 2.7 is based on 536,352; 574,132; and 576,220 unique examinees who took the GRE revised General Test in testing year 2012–13, 2013–14, and 2014–15, respectively. Since examinees were allowed to select more than one region, the number of examinees in each region do not add up to the total number of examinees.

18

Preferred Region for Graduate Study (continued)

Table 2.9 shows that the percentages of test takers preferring to study in all U.S. regions increased from 2012–13 to 2014–15. The percentages of test takers preferring to study in Canada, Australia/New Zealand, and Europe increased from 2012–13 to 2014–15, and the percentages of test takers preferring to study in Asia, Latin America, and Africa remained stable.

Table 2.9. Preferred Region for Graduate Study, Examinee Population

Latin America	11,381	2	13,192	2	13,613	2					

Note: This table is based on 536,352, 574,132, and 576,220 unique examinees who took the GRE revised General Test in testing year 2012–13, 2013–14, and 2014–15, respectively. Since examinees were allowed to select more than one region, the percentages do not add up to 100.

Examinee Population

Excluding testing in the United States, Figure 3.1 shows that from testing year 2012–13 to 2014–15, the largest number of test takers were in India. From 2012–13 to 2014–15, the number of test takers in India increased and the number of test takers in Mainland China and Europe decreased.

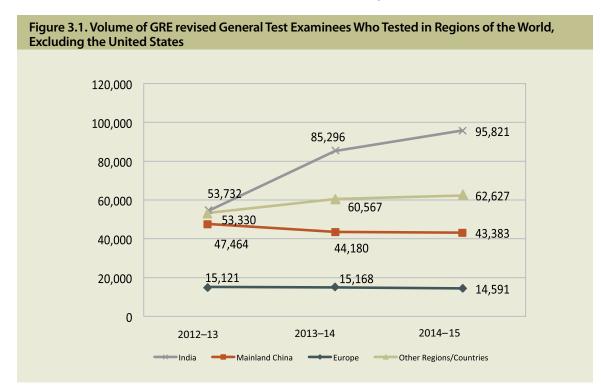

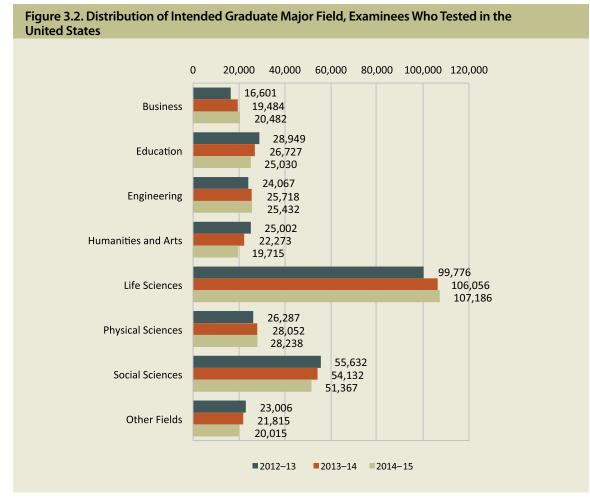

Table 3.1 shows that from 2012–13 to 2014–15, the percentage of test takers in the United States and Mainland China decreased and the percentage of test takers in India increased.

Table 3.1. Volume of GRE revised General Test Examinees, by World Region/Country										
World Region/Country	2012	2–13	2013	3–14	2014–15					
Where Examinees Tested	Ν	Percent	Ν	Percent	Ν	Percent				
United States	366,705	68	368,921	64	359,798	62				
India	53,732	10	85,296	15	95,821	17				
Mainland China	47,464	9	44,180	8	43,383	8				
Europe	15,121	3	15,168	3	14,591	3				
Other Regions/Countries	53,330	10	60,567	11	62,627	11				
Total	536,352	100	574,132	100	576,220	100				

Intended Graduate Major Field

Figure 3.2 shows that in testing years 2012–13, 2013–14, and 2014–15, test takers in the United States with intended graduate majors in the Life Sciences and Social Sciences were the largest groups. From testing year 2012–13 to 2014–15, the number of test takers with intended graduate majors in the Life Sciences, Physical Sciences, and Business increased. The number of test takers with intended graduate majors in the Social Sciences, Humanities and Arts, and Education decreased. The number of test takers with an intended graduate major in Engineering increased from 2012–13 to 2013–14, and decreased from 2013–14 to 2014–15.

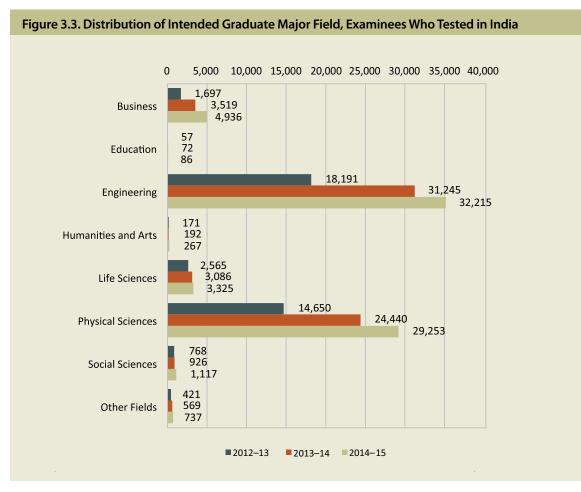

Note: See page 23 for a list of major fields.

Table 3.2 shows that from testing year 2012–13 to 2014–15, the percentages of test takers in the United States with intended graduate majors in the Life Sciences, Physical Sciences, and Business increased. The percentages of test takers with intended graduate majors in the Social Sciences, Humanities and Arts, and Education decreased. The percentage of test takers with an intended graduate major in Engineering was stable. In each testing year, at least 14 percent of the test takers did not indicate their intended graduate major.

Table 3.2. Distribu	tion of Intende	ed Graduate Ma	ajor Field, Exan	ninees Who Tes	ted in the Unit	ed States	
Intended Graduate	2012	2–13	2013	3–14	2014–15

Total	366,705	100	368,921	100	359,798	100	

*"No Major Provided" includes those test takers who indicated their intended graduate major as "Any Department Not Listed," those who did not respond to the background question, and those who provided an invalid answer.

Figure 3.3 shows that in testing years 2012–13, 2013–14, and 2014–15, test takers in India with intended graduate majors in Engineering and the Physical Sciences were the largest groups. From testing year 2012–13 to 2014–15, the number of test takers increased across all intended graduate majors.

Note: See page 23 for a list of major fields.

Table 3.3 shows that from testing year 2012–13 to 2014–15, the percentages of test takers in India with intended graduate majors in Engineering, Physical Sciences, and Business increased. The percentage of test takers with intended graduate majors in the Life Sciences decreased. In each testing year, at least 12 percent of the test takers did not indicate their intended graduate major.

Table 3.3. Distribution of Intended Graduate Major Field, Examinees Who Tested in India										
Intended Graduate	2012	2–13	2013	3–14	2014	4–15

59

Figure 3.4 shows that in testing years 2012–13, 2013–14, and 2014–15, test takers in Mainland China with intended graduate majors in Engineering and the Physical Sciences were the largest groups.

From testing year 2012–13 to 2014–15, the number of test takers decreased in all of the intended graduate majors except Business and Physical Sciences.

Note: See page 23 for a list of major fields.

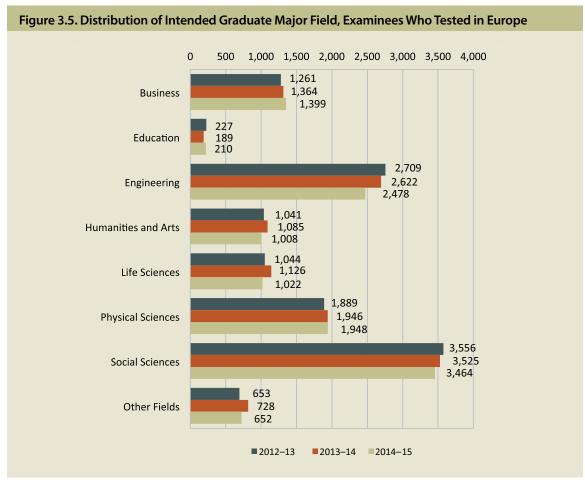

Table 3.4 shows that from testing year 2012–13 to 2014–15, the percentages of test takers in Mainland China whose intended graduate major was in the Physical Sciences, Social Sciences, and Business increased. The percentage of test takers whose intended graduate major was in Engineering and the Life Sciences decreased. The percentage of test takers whose intended graduate major was in the Humanities and Arts, and Education was stable. In each testing year, at least 11 percent of the test takers did not indicate their intended graduate major.

Table 3.4. Distribu	Table 3.4. Distribution of Intended Graduate Major Field, Examinees Who Tested in Mainland China											
Intended Graduate	2012	2–13	2013	3–14	2014	1–15						
Major Field	N	Percent	N	Percent	Ν	Percent						
Business	2,657	6	2,859	6	3,106	7						
Education	894	2	873	2	846	2						
Engineering	12,156	26	11,577	26	11,039	25						
Humanities and Arts	1,294	3	1,147	3	1,132	3						
Life Sciences	3,639	8	3,297	7	3,135	7						
Physical Sciences	9,331	20	9,283	21	9,628	22						
Social Sciences	2,955	6	2,935	7	2,912	7						
Other Fields	2,774	6	2,691	6	2,716	6						
Undecided	5,301	11	4,338	10	4,021	9						
No Major Provided*	6,463	14	5,180	12	4,848	11						
Total	47,464	100	44,180	100	43,383	100						

Note: See page 23 for a list of major fields.

*"No Major Provided" includes those test takers who indicated their intended graduate major as "Any Department Not Listed," those who did not respond to the background question, and those who provided an invalid answer.

Figure 3.5 shows that in testing years 2012–13, 2013–14, and 2014–15, test takers in Europe with intended graduate majors in the Social Sciences, Engineering, and the Physical Sciences were the largest groups. From testing year 2012–13 to 2014–15, the number of test takers with an intended graduate major in the Physical Sciences and Business increased. The number of test takers whose intended graduate major was in the Social Sciences, Engineering, and Arts, and Education decreased.

Note: See page 23 for a list of major fields.

Table 3.5 shows that from testing year 2012–13 to 2014–15, the percentages of test takers in Europe whose intended graduate major was in Business and the Physical Sciences increased. The percentage of test takers whose intended graduate major was in Engineering and Education decreased. The percentage of test takers whose intended graduate major was in the Social Sciences, Life Sciences, and Humanities and Arts was stable. In each testing year, at least 12 percent of the test takers in Europe did not indicate their intended graduate major.

Table 3.5. Distribu	Table 3.5. Distribution of Intended Graduate Major Field, Examinees Who Tested in Europe										
Intended	2012	2–13	2013	3–14	2014–15						
Graduate Major Field	Ν	Percent	Ν	Percent	Ν	Percent					
Business	1,261	8	1,364	9	1,399	10					
Education	227	2	189	1	210	1					
Engineering	2,709	18	2,622	17	2,478	17					
Humanities and Arts	1,041	7	1,085	7	1,008	7					
Life Sciences	1,044	7	1,126	7	1,022	7					
Physical Sciences	1,889	12	1,946	13	1,948	13					
Social Sciences	3,556	24	3,525	23	3,464	24					
Other Fields	653	4	728	5	652	4					
Undecided	728	5	692	5	618	4					
No Major Provided*	2,013	13	1,891	12	1,792	12					
Total	15,121	100	15,168	100	14,591	100					

Note: See page 23 for a list of major fields.

*"No Major Provided" includes those test takers who indicated their intended graduate major as "Any Department Not Listed," those who did not respond to the background question, and those who provided an invalid answer.

Preferred Region for Graduate Study

Table 3.6 shows that in testing years 2012–13, 2013–14, and 2014–15, test takers in the United States preferred to study in the United States. The most preferred U.S. regions were the South and West. When considering other regions of the world, test takers in the United States preferred to study in Europe and Canada over other regions.

Table 3.6. Preferred Region for Graduate Study, Examinees Who Tested in the United States											
	201	2–13	201	3–14	201	4–15					
Preferred Region	Ν	Percent	Ν	Percent	Ν	Percent					
U.S. Regions											
New England	93,281	25	92,925	25	90,047	25					
Mid-Atlantic	99,879	27	96,617	26	93,038	26					
South	120,040	33	118,960	32	116,940	33					
Midwest	93,307	25	91,590	25	89,367	25					
Southwest	68,569	19	69,052	19	68,689	19					
West	113,461	31	116,336	32	115,385	32					
Non-U.S. Regions											
Canada	23,292	6	24,657	7	25,425	7					
Africa	3,711	1	3,790	1	3,411	<1					
Asia	7,617	2	8,092	2	7,899	2					
Australia/New Zealand	15,460	4	17,031	5	16,925	5					
Europe	40,255	11	41,847	11	42,605	12					
Latin America	7,130	2	7,268	2	7,042	2					

Note: This table is based on 366,705; 368,921; and 359,798 unique examinees who took the GRE revised General Test in testing year 2012–13, 2013–14, and 2014–15, respectively, in the United States. Since examinees were allowed to select more than one region, the percentages do not add up to 100.

Preferred Region for Graduate Study (continued)

Table 3.7 shows that in testing years 2012–13, 2013–14, and 2014–15, test takers in India preferred to study in the United States. The percentages of preference were similar across all U.S. regions. When considering other regions of the world, test takers in India preferred Canada and Europe.

Table 3.7. Preferred Region for Graduate Study, Examinees Who Tested in India									
	2012–13		2013–14		2014–15				
Preferred Region	Ν	Percent	Ν	Percent	Ν	Percent			
U.S. Regions									
New England	20,334	38	37,951	44	46,201	48			
Mid-Atlantic	22,064	41	38,816	46	47,151	49			
South	21,437	40	38,353	45	46,595	49			
Midwest	21,679	40	38,451	45	46,661	49			
Southwest	21,207	39	38,151	45	46,406	48			
West	22,274	41	39,609	46	48,207	50			
Non-U.S. Regions									
Canada	13,585	25	24,170	28	28,579	30			
Africa	816	2	1,562	2	1,689	2			
Asia	5,721	11	9,618	11	10,917	11			
Australia/New Zealand	7,668	14	14,563	17	17,892	19			
Europe	11,603	22	19,464	23	23,087	24			
Latin America	2,426	5	3,765	4	4,398	5			

Note: This table is based on 53,732; 85,296; and 95,821 unique examinees who took the GRE revised General Test in testing year 2012–13, 2013–14, and 2014–15, respectively, in India. Since examinees were allowed to select more than one region, the percentages do not add up to 100.

Preferred Region for Graduate Study (continued)

Table 3.8 shows that in testing years 2012–13, 2013–14, and 2014–15, test takers in Europe preferred to study in Europe. When considering other regions of the world, test takers in Europe preferred the United States and Canada.

Table 3.8. Preferred Region for Graduate Study, Examinees Who Tested in Europe								
	2012–13		2013–14		2014–15			
Preferred Region	Ν	Percent	Ν	Percent	Ν	Percent		
U.S. Regions								
New England	4,580	30	4,665	31	4,561	31		
Mid-Atlantic	4,358	29	4,329	29	4,286	29		
South	2,726	18	2,703	18	2,705	19		
Midwest	2,850	19	2,777	18	2,829	19		
Southwest	2,303	15	2,267	15	2,278	16		
West	4,628	31	4,712	31	4,689	32		
Non-U.S. Regions								
Canada	2,383	16	2,374	16	2,408	17		
Africa	113	1	119	1	95	1		
Asia	634	4	690	5	748	5		
Australia/New Zealand	1,031	7	1,051	7	1,103	8		
Europe	5,437	36	5,691	38	5,883	40		
Latin America	231	2	213	1	184	1		

Note: This table is based on 15,121; 15,168; and 14,591 unique examinees who took the GRE revised General Test in testing year 2012–13, 2013–14, and 2014–15, respectively. Since examinees were allowed to select more than one region, the percentages do not add up to 100.

About ETS

At ETS, we advance quality and equity in education for people worldwide by creating assessments based on rigorous research. ETS serves individuals, educational institutions and government agencies by providing customized solutions for teacher certification, English language learning, and elementary, secondary and postsecondary education, and by conducting education research, analysis and policy studies. Founded as a nonprofit in 1947, ETS develops, administers and scores more than 50 million tests annually — including the *TOEFL*[®] and *TOEIC*[®] tests, the *GRE*[®] tests and *The Praxis Series*[®] assessments — in more than 180 countries, at over 9,000 locations worldwide.
