Total score and subscores are reported as scale scores. The scale range for the total score is 120-200. The standard error of measurement, an index of the variation in all test scores due to the imperfect precision of the measurement process, should be considered when interpreting individual test results. See the "MFT Comparative Data Guide" on the web at [www.ets.org/hea/mft/compare.html](http://www.ets.org/hea/mft/compare.html) for an explanation and listing of the standard errors of measurement.

\* An asterisk preceding the name indicates that this student answered (marked) fewer than half of the questions. The scores of this student are not included in the group means.
