

**GRE® revised General Test State Means**  
**Testing Years 2012-2013, 2013-14, and 2014-15**  
 (State defined by location of attending institution)

Disclaimer about Data Sorted by Attending Institution: Test takers are not required to identify the institution they are attending. As a consequence, among those who tested in the U.S., only about 77% of test takers in 2012-13, 67% in 2013-14, and 65% in 2014-15 have identified an undergraduate institution, and the data from these self-selected test takers is self-reported. Furthermore, some of these test takers have been out of school for several years. Even more importantly, the GRE® General Test has not been designed to measure state-level education outcomes. For all of these reasons, caution should be exercised in seeing these results as an accurate reflection on the current undergraduate curriculum.

State	Testing Year	Number of Test Takers	Verbal Reasoning		Quantitative Reasoning		Analytical Writing	
			Mean	Standard Deviation	Mean	Standard Deviation	Mean	Standard Deviation
