Da Nang - a city of modern bridges

My hometown Danang is endowed with spectacular views and charming, captivating landscapes. It is a city of modern bridges. Visitors often come here to admire the amazing beauty of the bridge in the city of Da Nang. That is the poetic Han river bridge, Dragon bridge, Tran Thi Ly bridge, Tuyen Son bridge, Thuan Phuoc bridge, ...

At nights, we can see the colored lights from the buildings, from the billboards and the splendid colors of the Han River bridges. The strange thing that makes Da Nang different from other cities is because of its beauty.

Dragon Bridge is a symbol of the city. On Sundays, A lot of people come here to watch the sprinkler and the fire of this modern bridge.

Tran Thi Ly Bridge located approximately 20m, this is a cable-stayed bridge with a textured surface and the leaning tower wire first in Vietnam. Standing here one can see the panorama in Danang Bay.
Thuan Phuoc Bridge connects the city with beautiful Tien Sa seaport.

Tuyen Son Bridge is a transit point for millions of tons of goods through our country.

Danang people are extremely friendly and kind. The food is good. It is a place for people to visit.
