What is friendship?

Friendship plays a very important part in our daily life. I think people can hardly live without relationship. Because when you are down, they will cheer you up; when you are in trouble, they will lend you a hand and even if they can't, they will listen.

A friendship is precious. Because the beginning of a friendship is very lucky. I think this is entirely based on the fate of it. Fate let us meet together. Friendship can bring a lot of benefits. Friends can help each other when they are in difficulty. Friends can share joy and depressed. A good friendship is not easy to get. And no matter how long the feelings won't change. So it is a pleasure to have a good friendship.

Friendship is very important for me. You can talk to your friends when you are upset. Sharing your happiness with friends can make life easier. Whenever you have problems, friends are you best choice.

Nobody can go through life without forming friendship -- one of the most valuable treasures life has to offer. When we are lonesome, we need friends to cheer us up. When we are in trouble, we need friends to help us to solve our problems. Indeed, none of us can ever exist alone in the world.

It is a wonderful thing that can make you happy in the lost time, you can get out of the sea, to meet the new life. Only those who have real friends, can feel its real beauty. Friendship is just a feeling, a harvest.

Knowing how precious friendship is, we should be careful in the choice of friends. We had better make friends with not only people who are well-informed but people who are of good character as well. On the other hand, we must keep away from people who are of bad character, such as those who are unreliable, dishonest, and selfish. Though we can never have too many friends, we must tell good friends from bad ones.

I need a friend when I want to find someone to talk to. Personally speaking, I'd like to make friends with people who are kind-hearted and diligent so that I can learn valuable qualities from them.

I would like to have a close friend better than many friends that are not very close to. Because true friendships are reliable and priceless.

Although sometimes misunderstanding and quarrels happen, we can always find a way to stand in the other's shoes, forgive the other's mistakes, and make it right. Therefore, we all need true friendship.
